

Hue Color Systems, LLC

Hue Color Systems recently introduced the CD-14 Carousel Ink Dispensing System for the most accurate color matching of UV and conventional offset inks in cartridges.

Company Description

Hue Color Systems, LLC is a one-stop supplier of ink dispensing systems; color blending equipment and software; ink mixers; vacuum-sealing machines; cartridge-filling machines; on-press ink dispensing systems; and ink pumps. We have more than 25 years of experience in the commercial printing and ink manufacturing industries. Hue Color Systems is a member of NAPIM, NPES, Print Suppliers Group and GATF/PIA.

Technical Services

Hue Color Systems, LLC houses state-of-the-art pressroom equipment and prides itself upon being a one-stop shop. All products are listed on our Web site for your review.

Facilities

Hue Color Systems, LLC's headquarters are located in Mamaroneck, NY, with major service personnel in the New York metropolitan area, as well as Southern California.

Major Products

- CD-14 Carousel Ink Dispenser—Designed to dispense from any type of cartridge, with automated and semi-automated models available.
- VAC 200XL Sealing Machine—A stainless steel vacuum-sealing machine that handles one to four 2.5 kilo cans at one time, with sealing times from 15 to 45 seconds, depending on the number of cans being sealed.
- Color Press™—A unique on-press dispensing system that uses the standard 2.5 kg vacuum-sealed conical can instead of a cartridge, which eliminates the need to carry dual inventories of cans and cartridges.
- PANTONE™ Formula Scales
- Ink Knives
- Vacuum Can Openers

New Products

Hue Color Systems, LLC has just launched the RM 500 and 501 Paint/Ink Blender "rotations mixers" for sheetfed inks. The RM series of mixers allows the ink technician to use the same container for mixing and shipping the product. This reduces labor cleanup costs, eliminates ink waste, reduces solvent use and increases overall productivity. The RM 500 handles a single can per cycle, while the RM 501 can handle multiple cans per cycle. Mixing time is determined by the size of the batch. The RM 500 has a capacity from 50 ml to 5 kilos (11 pounds), and the RM 501 can handle 50 ml to 10 kilos (22 pounds). Both units are tabletop models and come with an optional base stand.

Hue Color Systems' RM 501 Paint/Ink Blender "Rotations Mixer."
