## Technical Profiles

# Hue Color Systems, LLC

### COMPANY DESCRIPTION

Hue Color Systems, LLC (HCS) is a supplier of ink dispensing systems, color blending equipment and software, ink mixers, vacuum sealing machines, cartridge filling machines, on-press ink dispensing systems and ink pumps. HCS is a one-stop location for solving ink dispensing and color blending problems. We have more than 25 years experience in the ink manufacturing and commercial printing industries.

HCS shops the world looking for quality, value-added products that are economical and useful for our customers. We service both the ink manufacturer and the commercial printer. HCS is proud to represent some of the finest press room hardware manufacturers from Europe and Asia. Our company is headquartered in Mamaroneck, NY and has service personnel in the New York metro area and on the West Coast in Southern California.

### TECHNICAL MISSION

Hue Color Systems, LLC prides itself on being a one-stop shop with state-of-the-art pressroom equipment.

### UNIQUE PRODUCTS

- CD-14 Carousel Dispenser  
This unit is designed to dispense from any size or type of cartridge. There are automated and semi-automated models available. You will be able to dispense from the 2 kilo plastic or corrugated cartridge; the Sonoco 8 pound cartridge; or the self-contained refillable cartridge. The type of cartridge to be used must be specified at the time of purchase, for installation by the factory. This is a complete system with a programmable 10

kilo (22 pound) capacity scale, a built-in computer, monitor and the Formulator software programs.

- VAC 200XL Sealing Machine  
This stainless steel vacuum sealing machine handles one to four 2.5 kilo cans at one time, with a sealing time from 15 to 45 seconds depending on the number of cans being sealed. Can also handle one kilo size vacuum cans.
- ColorPress™ is a unique on-press dispensing system that use the standard 2.5 kg vacuum sealed conical can instead of a cartridge. This eliminates the need to carry dual inventories of cans and cartridges, while giving the printer all the benefits of cartridge technology.

### CONCLUSION

Hue Color Systems, LLC works with ink companies and commercial printers to make color blending and ink dispensing more accurate and economical while increasing productivity.
